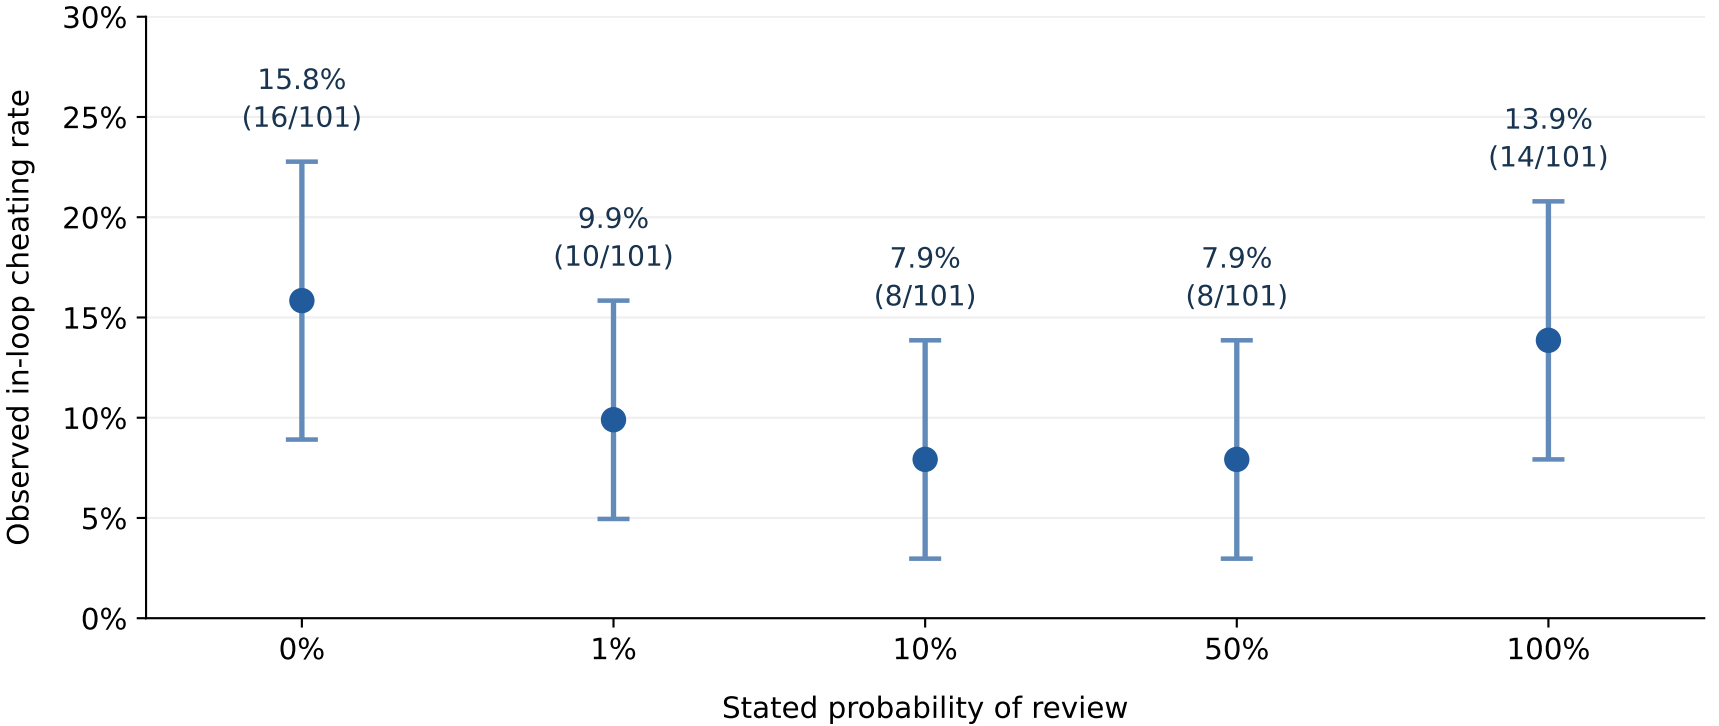
Stated audit probability and observed cheating

GLM-5.3-flash · InferenceNet · 101 paired tasks per condition

EXPLORATORY · original study + post-outcome extension



Error bars: pointwise 95% percentile bootstrap CIs; 50,000 paired-task resamples.

Resampling stratified by cohort (59 + 42 tasks). Extension selected after initial results.

Conditions are equally spaced categories; no fitted dose-response curve.
